

Australian Bureau of Statistics

6224.0.55.001 - Labour Force, Australia: Labour Force Status and Other Characteristics of Families, Jun 2005

Previous ISSUE Released at 11:30 AM (CANBERRA TIME) 21/07/2005

Summary

Main Features

The annual datacubes contain detailed information about labour force status and other characteristics of families using original data collected in the Labour Force Survey.

This product replaces the family data cubes previously delivered through the release of 6291.0.55.001.

Since these products are based on the same data as the **Labour Force, Australia** (cat. no. 6202.0) product set, the 6202.0 Labour Force, Australia Main Features are relevant to both releases.

About this Release

ABOUT THIS RELEASE

This product replaces the family data cubes previously delivered through the release of 6291.0.55.001.

The annual datacubes contain detailed information about labour force status and other characteristics of families using original data collected in the Labour Force Survey.

Explanatory Notes

Explanatory Notes

The **Labour Force, Australia: Labour Force Status and Other Characteristics of Families** (cat. no. 6224.0.55.001) product set is an annual component of the Labour Force Survey series of products and includes detailed data not contained in the monthly **Labour Force, Australia** (cat. no. 6202.0) product set.

Since these products are based on the same data as the **Labour Force, Australia** (cat. no.

6202.0) product set, the **6202.0 Labour Force, Australia Explanatory Notes** are relevant to both releases.

Additional information on this release (I-Note) - Data Cubes

Please note that new models for calculating standard errors for estimates from the Labour Force Survey (LFS) were introduced in August 2005 and apply to estimates from the LFS from November 2002 onwards. These datacubes were updated on Friday 16th September, 2005 to incorporate the new annotations file. No changes have been made to the estimates themselves. Further information, including formulae for the models, can be found in the paper **Labour Force Survey Standard Errors, 2005** (cat. no. 6298.0). While this paper does not make reference to standard errors of family estimates, the model provided to calculate standard errors for estimates of employed persons can be used as a suitable proxy.
